

**Sunbeam Institute of Information Technology
Pune and Karad**

Module - Concepts of Operating Systems and Administration

Trainer - Devendra Dhande

Email – devendra.dhande@sunbeaminfo.com

mother board

Endianness (byte ordering)

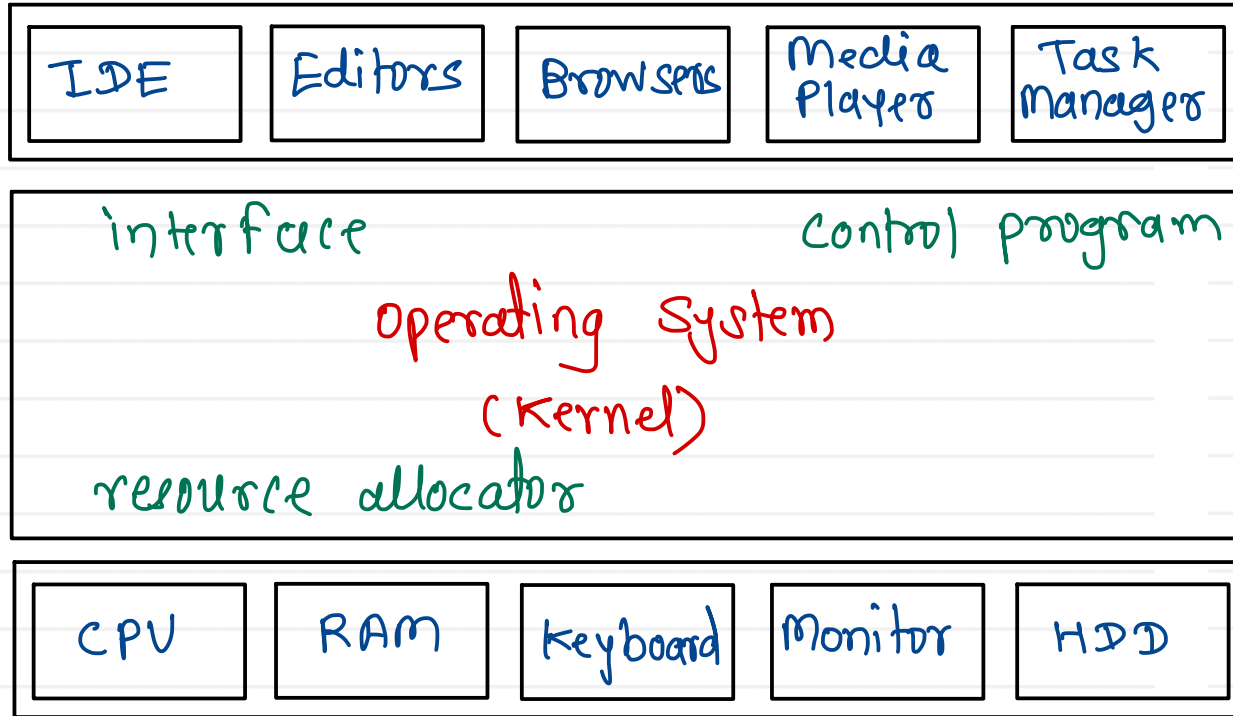

Little

Big

Lower byte - lower address
Higher byte - higher address
e.g. ARM, AVR, x86...

Lower byte - higher address
Higher byte - lower address
e.g. Networks

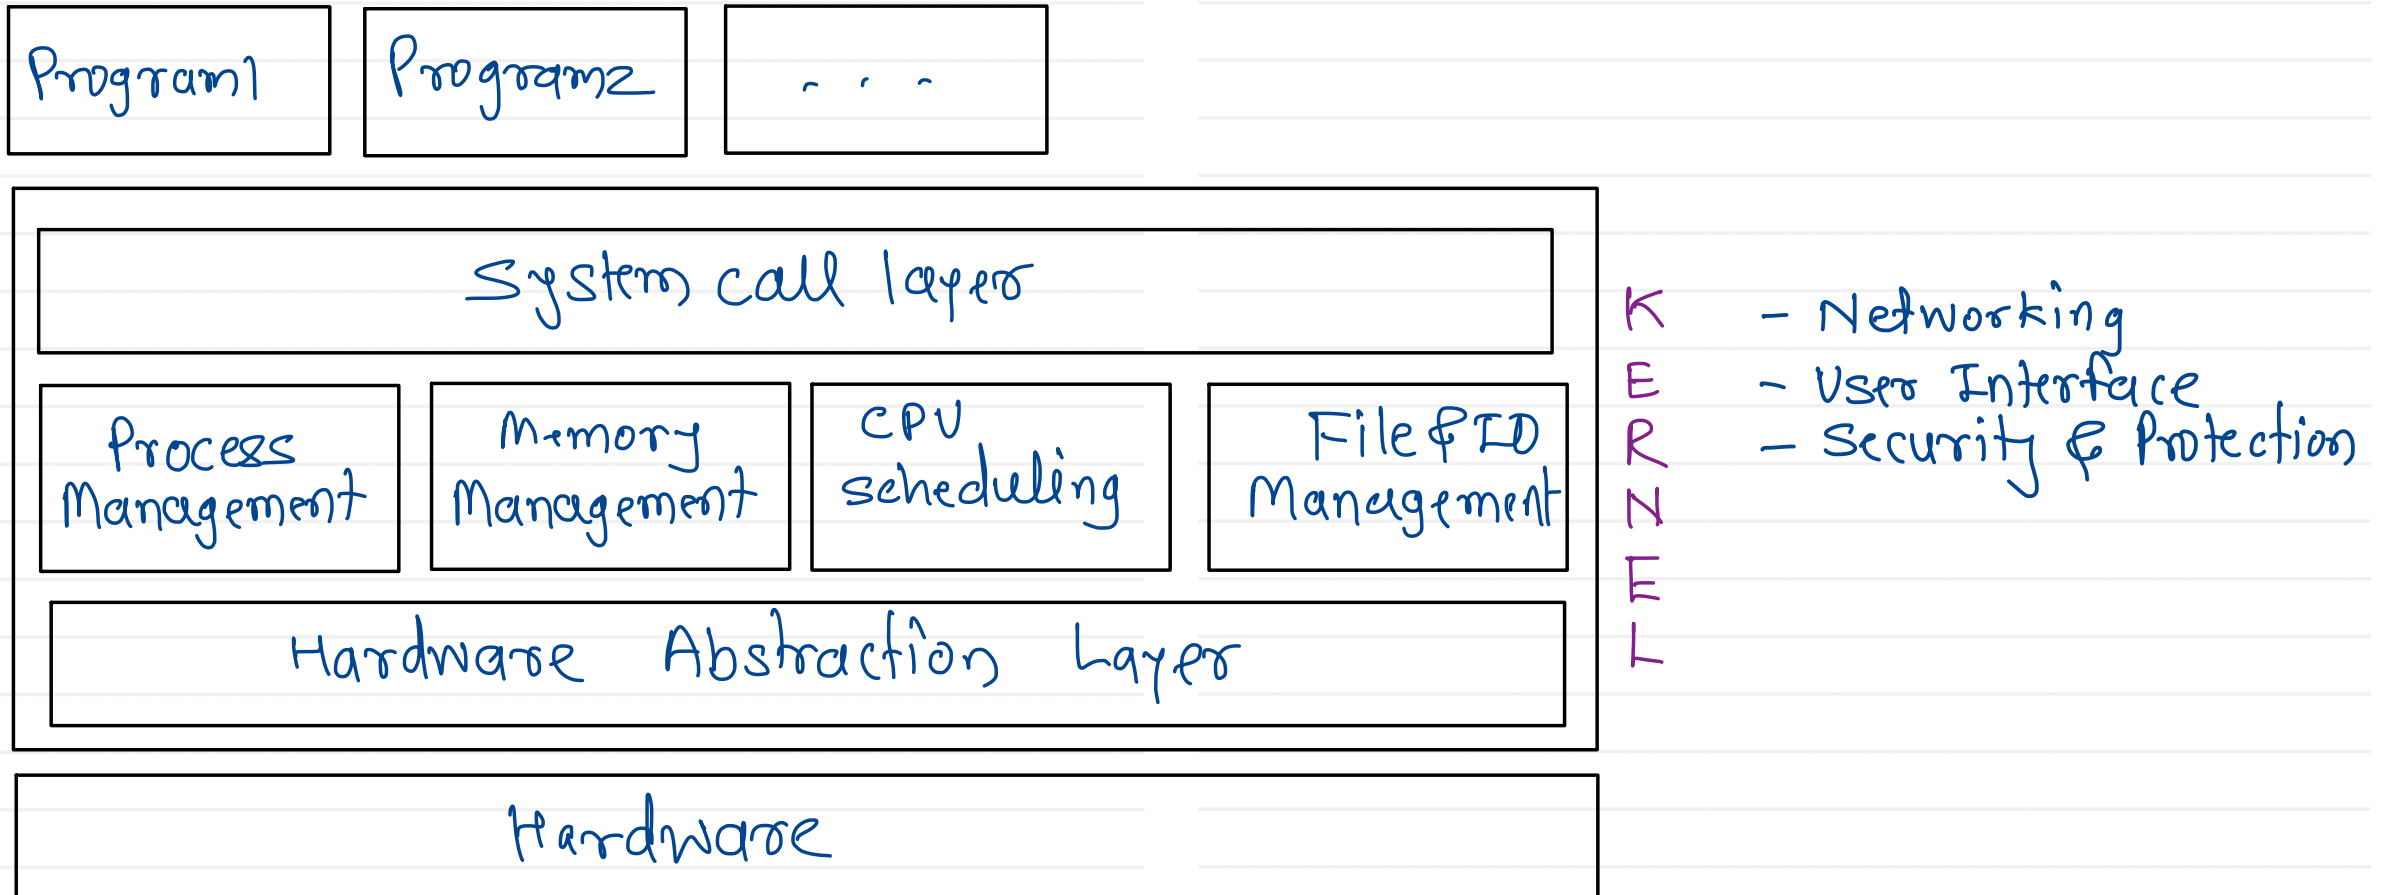

End User

- interface betⁿ end-users and hardware
- interface betⁿ application softwares and hardware
- Control program which controls execution of programs running on the top of it.
- resource allocator/manager which manages limited hardware resources.

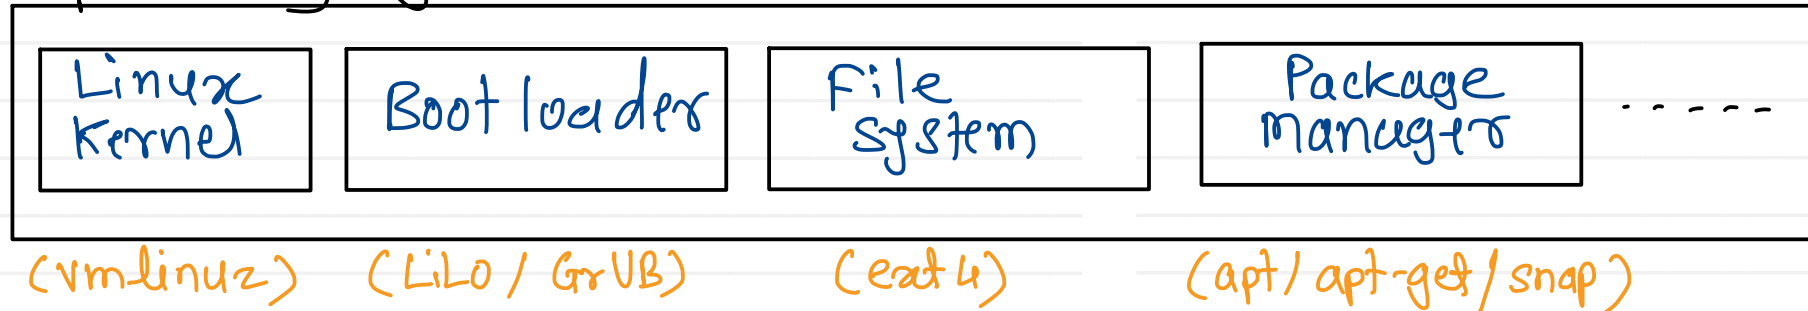

$$CD/DVD/ISO = \underset{\text{(Kernel)}}{\text{Core OS}} + \text{System Utilities} + \text{Appⁿ S/W}$$

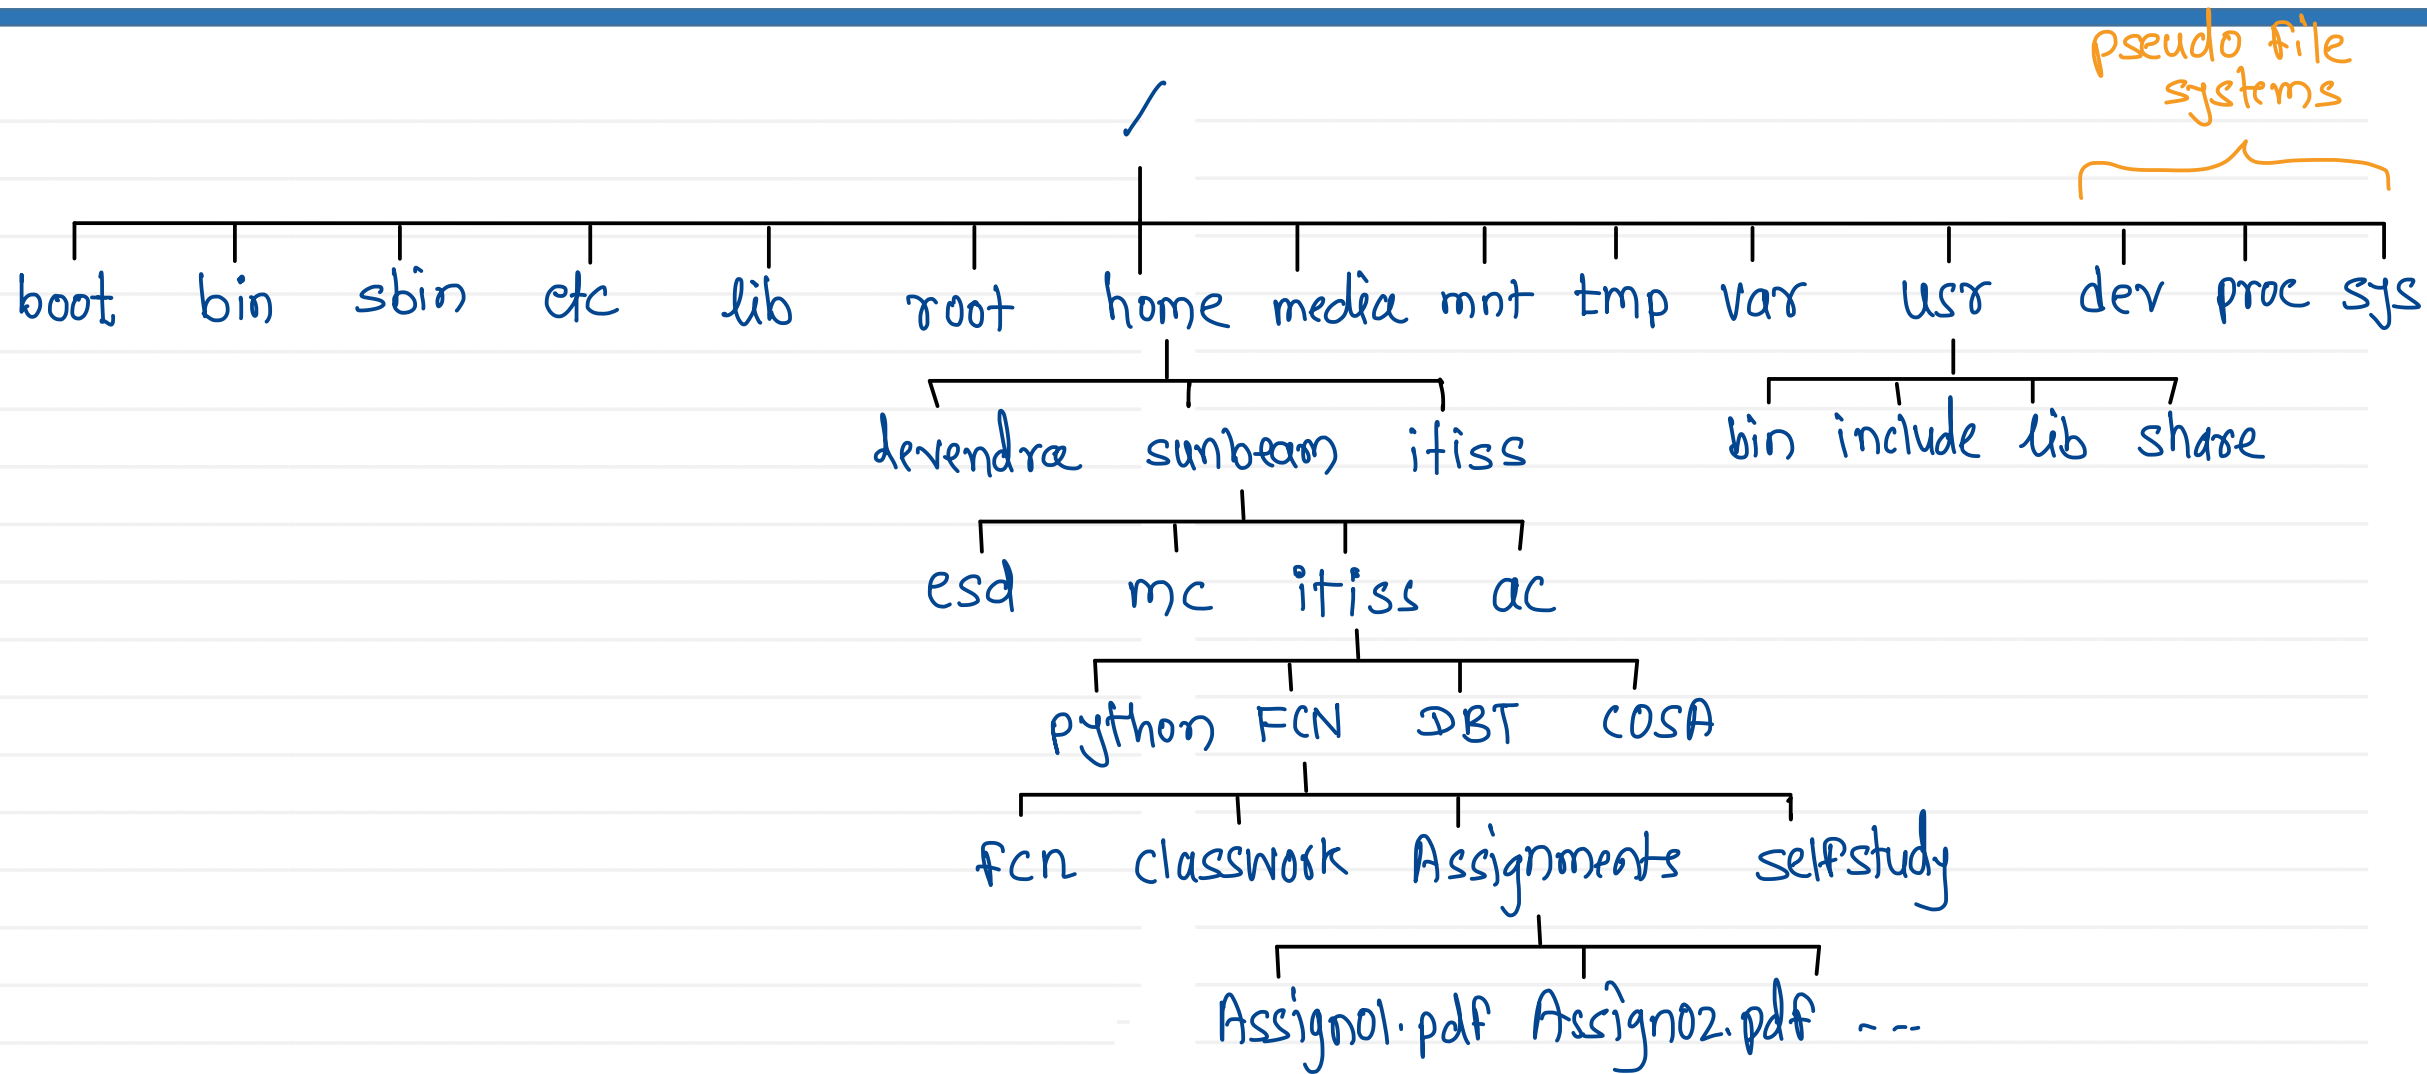

Kernel functions

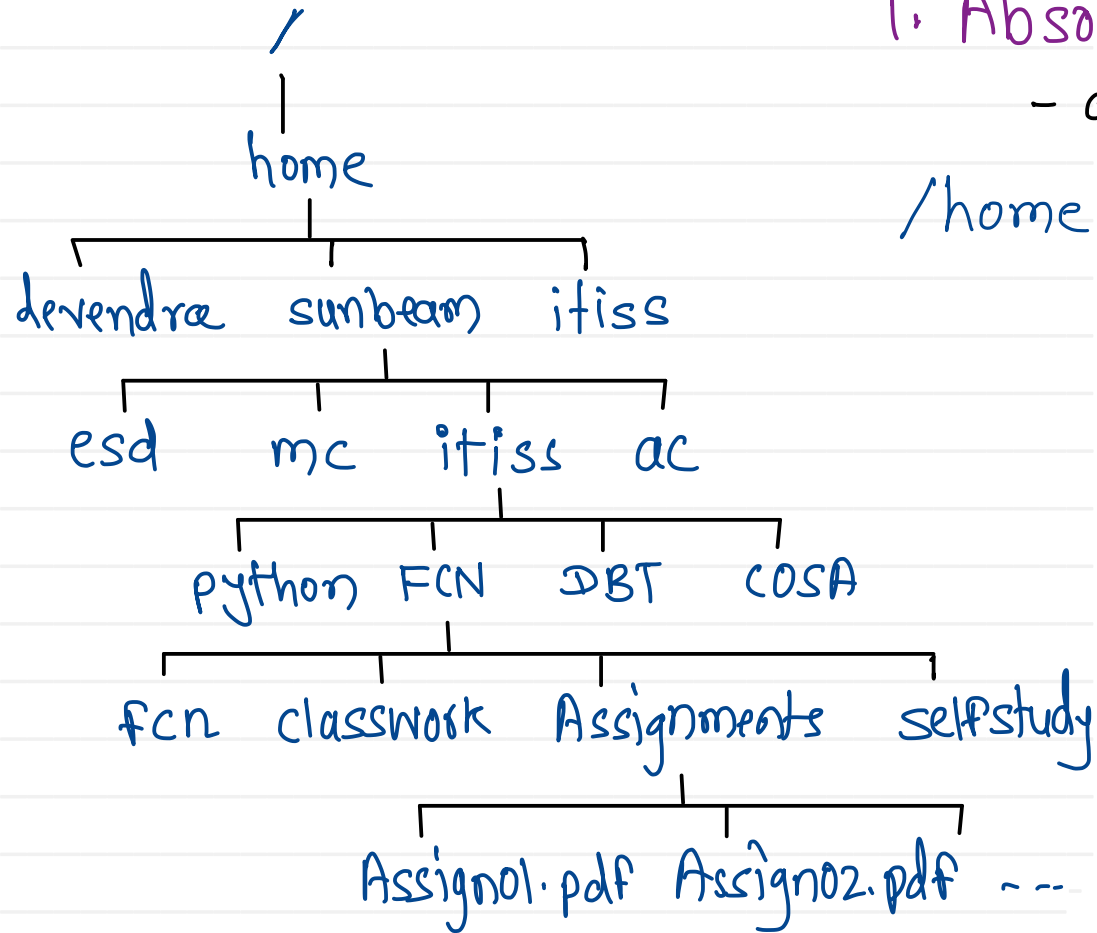

Linux Distribution

Operating system

1. Absolute path

- always starts with '/'

/home/sunbeam/itiss/FCN/Assignments/Assign01.pdf

2. Relative path

- starts wrt working directory

e.g. working directory is itiss

FCN/Assignments/Assign01.pdf
